

We leverage world-class technology, empowered by our team of engineering experts, to thrive in mission-critical environments.

CAPABILITIES.

- Proven experience designing and manufacturing electronic products for the last 45 years
- Advanced electronics manufacturing in a world class, quality-controlled environment
- Full capability life cycle support for electronic products, including integration
- Build to specification, design or print in our high-volume production facility
- Test and Validation capabilities including EMC, EMI, Vibration, Shock and Environmental

DISCRIMINATORS.

- Sovereign manufacturing capability, 100% Australian owned and operated
- Manufacturing partner of choice to defence and space primes
- Proven track record of Delivery in Full on Time to Global OEMs
- Secure manufacturing facility
- Continuous investment in product and process R&D

PRODUCTS.

- DC power management and distribution
- Power suppliers and converters
- Dual Battery & Charging Systems
- REDARC Thermal Signature Enhancement Kits (RTSEK)
- Monitoring Systems (HUMS)
- Maritime LED lighting

ACCREDITATIONS & CERTIFICATIONS.

- ISO9001
- ISO45001
- IPC 610 class 3
- AS9100 (in progress)
- ISO14001
- DISP
- JOSCAR-AU
- CMMC level 2 (in progress)
